

# Map of Septic System and Disposal Field

---

1. Make a rough sketch locating your septic tank and disposal field in relation to surrounding reference points. Begin by sketching your house, driveway, water well and other landscape features such as trees, rocks or fences.
2. Measure and record distances from your house to the cover of your septic tank and to the corner of your disposal field, if possible. As long as the distances are correct, do not be concerned whether or not the drawing is to scale.
3. Keep this information on file as a permanent record for use in maintenance and to pass on to subsequent owners.
